OFFICIAL GAA PLAYING RULE CHANGES

THE KICK OUT

AIM: To encourage teams to kick the ball further up the field from the kick out; To present opportunities for the skill of clean catching by bolstering the existing Mark rule.

Supporting evidence and rationale:

During the Allianz National Football Leagues, when the kick out was taken from the 20m line, there was an increase in the number of Marks claimed by teams compared to the 2018 Championship.

During the Allianz National Football Leagues 2019 there was also a significant increase in the number of contested kick outs (i.e. between both teams) compared to the recently concluded 2019 All-Ireland Championship.

THE SIN BIN

AIM: To reduce a rise in cynical play/'professional' fouling and implement a penalty 'on the day' which encourages behavioural change.

Supporting evidence and rationale:

On average during the 2019 NFL, teams with an extra player scored 2.9 points compared to 1 point for the opposition in the same period (i.e. during the period when an opponent was in the sin-bin).

The average 'ball in play' time during a sin bin throughout the Allianz National Football League 2019 (30 games analysed) was 5:15 - entirely consistent with the remainder of the game.

The proposed introduction of the Sin Bin also offers teams a greater level of equity in that it removes the effect of a strong group of substitutes who, under current rule, would replace any player who received a black card.

Black Card is shown

10 minute clock starts once the player has left the field of play. Game will re-commence at the same time that the Sin-Bin period commences.

THE ADVANCED MARK

AIM: To offer an incentive for the longer kicking of the ball into the opposition's defensive area and reward players who catch the ball cleanly under these circumstances with a Mark.

Supporting evidence and rationale:

During its trialling in the Allianz National Football Leagues 2019, this experimental rule provided for a 34% increase in the number of kick passes in the game (2019 NFL v 2018 C'chip) - 132 v 107 and, furthermore, it resulted in an increase in the number of contested foot passes (8%).

It provided for the first reduction in the ratio of hand passing to foot passing in ten seasons (3.5:1 in the 2018 C'chip to 2.9:1 NFL 2019), meaning teams were inclined to kick the ball more and hand pass it less than had been the case for at least the last decade.
